

Gatwesy Pacific Terminal E.I.S.

To Whom it may concern,

Please study the Health and Quality of Life effects for the Neighborhoods surrounding the Airport expansion (which is South of Smith Rd Ferndale, West of Northwest Rd to Eldridge/Old Marine Hwy.) In Regards to Noise increase combined with Rail traffic noise increase in these same neighborhoods.

Please calculate the effects of these combined Noise increases on Taxable values of the Properties and Resale values for these homes compared with current values.

Please calculate the combined loss of Revenue from Decreased Property values and Medical expenses incurred for Physical and mental-

illnesses, for the individual Residents AS well as the County City and State and Federal Supporting Assistance Programs.

Please estimate the costs of Loss of Relationships caused by Relocation for the people who now Reside in these neighborhoods AS well as any Lawsuits for Loss of "Pursuit of Happiness" Destroyed by accelerated Noise Levels.

Thank You,

Kathleen Gallagher

(Website was unable to take my comment
"corrupted" with illegal activity.)

Gateway Pacific Terminal E.I.S.

To Whom it may concern,

Please Study How Long it will take to mitigate Environmental Damages and How much money it will cost U.S. Taxpayers. Considering the 12 years of Legal work with Dine Nation to mitigate the loss of their ^{1st} Aquifer and that mitigation/legal action has begun to protect the 2nd Aquifer as well as defend the Retirement benefits of the employees of the COAL compnys.

Please Study the Satisfaction Levels of the Dine Nation As compared to the COAL interests, following the 1st (2yr) Legal Action Settlement

Please estimate the amount of Rain water run off pollution from the

Staging Areas and the combined mitigation costs + G.P.T. to "mitigate" any damages caused there.

Please compare these to expected Profits of the G.P.T., Coal Transport investors and to the expected wages and benefits for employees of G.P.T. in Whatcom County and if able to the combined wages and benefits for all of the employees for the mining & Transportation of Coal through Cherry Point G.P.T.

Thank You,

Kathleen Gallagher

Gateway Pacific E.I.S.

To Whom it Concerns,

Please study The effects of the
Tanker Traffic increase on the Resident
and migratory Cetacean populations of
The Salish Sea.

Please Study Noise effects on Echolocation,
Oil Spills and Coal Dust spills effecting
Cetaceans and their food sources.

Please Study the effects on the
Tourism businesses if there are
ill effects on the Cetaceans due
to the Tanker Traffic.

Please Study the effects of
invasive species pollution from
bilge waters discharged from the

Tanker traffic between Chunks and
Cherry Point

Please calculate the combined
Dollar amount for mitigation
of Loss of species plant and
animal, as well as pollution
clean up & invasive species cleanup
and Loss of Fishing + Tourism
incomes and unemployment /
Retraining funds.
